

The “**Leghorn Srl**” is in the forefront of designing and installation of biometric systems of **Access Control** since this technology is available.

We have installed a biometric system on a business case , so that anybody can approach the content if it isn't authorized from the owner of content.

The opening will be activated only if the fingerprint previously registered is recognized.

Fingerprint recognition

The biometric sensor activates only if the password is typed correctly.

To recognize the user it's necessary to put the finger on the sensor with light and constant pressure.

If the fingerprint is recognized a green led lights up on the form and the business case opens; on the contrary a red led lights up and the operation must be repeated.

New users' registration

It's possible to register up to 200 users. To register a new fingerprint it's necessary to type a password. In this way the facility enters the registration cycle of new users. A person “**super user**” identifies itself and registers the new user's fingerprint.

If the registration is successful, the “**super user**” identifies itself again to exit the registration cycle. Therefore **ALUMINIUM BIOMETRIC BUSINESS CASE** stores every opening and its date and time. Every possibility of tampering is impossible.

Our **ALUMINIUM BIOMETRIC BUSINESS CASE** is completely autonomous; it is in fact fed with rechargeable batteries Ni-MH, that guarantee a long duration and many recharging cycles.

The duration of the batteries of the beauty case depends on the frequency of its use, so we suggest to avoid running the battery completely down.

We suggest to recharge the facility for a period of 10/15 hours

The **BIOMETRIC BUSINESS CASE** is not only an anti-tampering system, but it's provided with an inner memory, able to register the day and time of the successive opening operations.

THE TAMPERING IS IMPOSSIBLE

General responsibility rules

Our **ALUMINIUM BIOMETRIC BUSINESS CASE** is guaranteed in accordance with rules except for the materials which are subject to wear.
