

# eLOCK Standard

## Electronic reusable security lock

### eLOCK Standard Electronic reusable security lock

- Prevents internal theft and fraud along the entire supply chain
- As soon as the seal is closed, it automatically generates a unique number that can be transferred to the cargo documentation. As long as the display shows the same number when the cargo arrives, you can be sure that the seal was not opened during the trip. If several stops are made on the journey, a new unique number is generated each time.

**eLOCK Standard** announces the unauthorized opening of the truck / container by generating a random number, which must be the same before and after the delivery of the cargo.

Entry-level product of the reusable electronic locks family manufactured by LeghornGroup, with basic features at a very competitive price.

### How eLOCK Standard works?

**eLOCK Standard** works in a very simple way:

- Each time the pin is pulled out of the plug (1) a random number is generated by the E-Lock (2) which is shown on the display for a few seconds and then stored in the internal device memory.
- By pushing the green button (3), the previously generated number appears on the display.

### SPECIFICATIONS

- Dimension: 106x156x38 mm
- Weight: 810 gr
- Fixing: 4 M6 screws
- Actuator: Mechanical life 1.000.000 cycle
- Operative temperature: -20° C + 50° C
- Storing temperature: -25° C + 80° C
- Battery: Lithium Long life non rechargeable
- Waterproof: IP 67
- Sealing: Special rubber for outdoor use
- Case Material: Shock-resistant Polycarbonate
- Vibration: Vibration resistant
- Display: LED 5 Digit - Red - night readable
- Cable: Inox AISI 316
- Lock plug: Plug with spring lock
- Security: May be locked with other kind of security seal
