

**GPS DETECTOR** is an automatic GSM/GPS device able to communicate its positioning in real time or at programmed timed intervals.

Ideal for tracking loading bins/skips, hired equipment of for a variety of situations where the target applications must be monitored for long periods of time.

GPS DETECTOR allows the tracking and monitoring of your goods in a safe and secure way. With **GPS DETECTOR** you cannot lose your equipment !!!

## TECHNICAL SPECIFICATION AND PRINCIPLE FUNCTIONS

1	GPS Detector is guaranteed to work independently for long periods of time without the need to recharge or change the battery (1450 operating cycles )
2	GPS Detector does not require any maintenance or servicing
3	GPS Detector advises if the battery is dead
4	GPS Detector communicates its positioning with coordinates in latitude or longitude.
5	GPS Detector is fitted with an anti removal security sensor.
6	GPS Detector is fitted with an internal memory to store data–security of which is guaranteed by a password
7	GPS Detector – Operates between a range of temperatures from –40°C to + 85°C
8	GPS Detector – Dimensions 106x156Xx38 mm
9	GPS Detector – Weight 720 g
10	GPS Detector – Waterproofing IP67
11	GPS Detector - Polycarbonate Housing
12	GPS Detector – Standard fixing with screws

**MISSING  
CONTAINER**

**GPS DETECTOR comes into action.**

### Anti-removal Security Sensor

In the event that the device is removed it sends an alert message with its positioning.

### **GPS DETECTOR**

communicates its positioning via a PC or simple mobile phone.

**FOUND !**

Easy to install, servicing or maintenance is not necessary, and it can work independently for long periods of time powered by the internal battery.
