LEGHORN s.r.l. specialise in the supply of hazardous goods labelling and packaging solutions to the hazardous goods transportation industry.

We stock a wide range of hazard warning diamonds (Haz-Chem Labels) which are typically available for next day delivery.

Popular stickers include class 3 warning diamonds, class 8 warning diamonds, class 2 flammable gas warning diamonds and the new environmentally hazardous label / environmentally hazardous placard which now replaces the old style marine pollutant label / marine pollutant mark specified which should be used when transporting marine pollutants via sea according to current IMDG regulations.

If you are unable to find a product to suit your labelling needs, please contact one of our sales team as we are able to print custom labels and are always looking to extend our range of both hazardous goods labelling and other labelling products.
