

### DESCRIPTION:

The "PALLETSEALS" is a plastic tag that guarantees the following informations:

- all fitosanitary codes
- consequential numbering and eventual name of the producer and/or the repairer
- further space that can be filled by the producer and/or the repairer with regards to the production lots or everything necessary
- available with barcode
- it can be produced in 4 pieces with the same numbering to attach them to all sides of the pallet
- IF NECESSARY:** it's possible to insert an electronic component (**RFID**) that can give and receive information through a reader

Further characteristic of the system:

- it can be produced with "pre-cut" or weakenings that break if try to remove or tamper it
- there's no possibility to find it on the market: it has made only by authorized producers, which have made investments for the realization of the die
- keeping of a data base by the producer that guarantees the uniqueness of the seal

P.S. a) the system is patented  
 b) the name of the system is PALLETSEALS  
 c) the name PALLETSEALS is registered.
